transaction slip number, an input of a delivery date of goods, a registration of goods, a registration of an amount of payment including a zero payment, an issue of a customer copy with said slip number, and a registration of a delivery; and sequentially executes, as processes upon payment, a display of incomplete transaction information by the input of said slip number, a registration of an amount of payment, a sum-up of sales amounts in case of a zero balance, and a termination of the incomplete transaction.

21. (New) A transaction managing apparatus for a POS terminal, comprising:

a transaction defining unit for defining a plurality of kinds of unsettled transaction types by combining a plurality of predetermined categories; and a management control unit for designating one of said plurality of kinds of unsettled transaction types by an interactive operation with the operator and managing and controlling processes in a lump from the start of the transaction to the end;

said transaction defining unit has an incomplete transaction management table, a type code table, an incomplete transaction line item information table, and a payment information management table;

basic management information including at least one of store number, incomplete transaction slip number, type code, transaction serial number upon occurrence, date and time of occurrence, customer number, requested amount, amount of down payment, balance, scheduled delivery date, delivery completion flag, sum-up possible/impossible flag, and totalization completion flag is stored in said incomplete transaction management table;

said type code table is designated by a type code of said incomplete transaction management table, and category combination information including at least one of sum-

**MARKED-UP COPY OF AMENDED CLAIM**

13. (Amended) An apparatus according to claim [12] 21, wherein on the basis of each table information of said transaction defining unit, said management control unit displays a list showing the incomplete transactions, a list of the customers who do not come to receive goods even after the scheduled delivery date, a list of the customers who do not come to pay after the term of payment, a list of the payment situations, and [the like] as a whole list or every type.
